IWK
AN **ATS** COMPANY

THE FUTURE DEMANDS RELIABILITY

CUTTING-EDGE TECHNOLOGY MADE BY IWK.

Whether a startup or big player, when it comes to production every company needs a partner that offers reliable solutions. Only with this foundation in place is it possible to vigorously pursue specific goals and ultimately achieve them. IWK is a partner that enables you to do exactly that. Every one of our tube fillers incorporates cutting-edge technology and know-how since 1893.

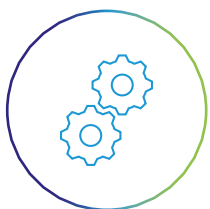

Would you also like to benefit from this powerful combination? Then allow us to introduce the IWK FP 8, which we have developed specially for the requirements of young companies and users producing small batches.

THE KEY ADVANTAGE FOR YOU IS THAT
OUR IWK FP 8 MAKES TUBE FILLING EASIER THAN EVER.

5

AT A GLANCE

5 GOOD REASONS TO CHOOSE OUR IWK FP 8.

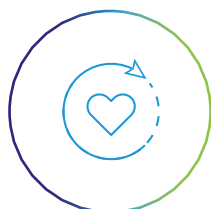

SIMPLE

Installation, cleaning and format changes are very straightforward.

INDUSTRY-TAILORED

Special configurations are available, customized to the requirements of the pharmaceutical, cosmetics and food industries.

DURABLE

This IWK machine is also extremely robust in use.

FLEXIBLE

Different tube materials and shapes can be processed.

FAST

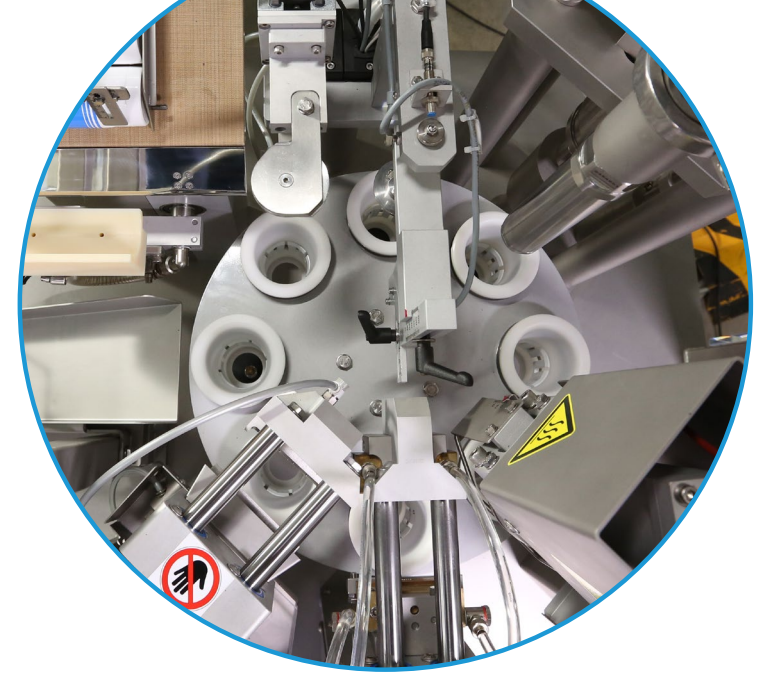

It will be completely ready to go in just 6 weeks.

We have summarized the most important elements of these exciting features on the following pages. Already have some questions?

Please get in touch directly with our IWK FP 8 experts at the relevant locations, and they will be happy to help. We have provided details for them on the back page.

IWK FP 8 IN PRACTICE

EVERY ELEMENT IS GEARED TOWARD YOUR SUCCESS.

Everything runs smoothly.

Don't want any complications? Then this tube filler is just right for your production. The intuitive control panel offers clear navigation. Consistent filling quantities with the highest filling accuracy are guaranteed by servo technology. And for even easier operation, cleaning and format changes are completed in under five minutes.

Everything fits perfectly.

Food, pharmaceuticals, cosmetics – each industry has specific requirements. That's why we offer the IWK FP 8 in custom configurations for these industries.

What they all have in common is that this tube filler has been specially developed for users with low production volumes or small batches to manufacture. This machine is the ideal fit for the transition to cost-effective laboratory operation.

Every component is durable.

"Engineered by IWK" – a promise that sets global standards for reliability. To support the productivity of customers worldwide as effectively possible, we install highly durable and robust elements that you can rely on when you use the IWK FP 8 for your tube filling.

Everything is possible.

Whether plastic, laminate or metal tubes, the IWK FP 8 can process them all. It is similarly flexible when it comes to tube shapes – round and oval are also possible. Of course, this tube filler also grows with your specific production requirements. It's easy to upgrade to fully automated operation at any time.

Everything runs at speed.

We have designed our production and delivery times specially so that you can get started at short notice. The IWK FP 8 can be with you in just six weeks. Ready to go, of course. All you need to do is plug it into the power supply and connect the air and water circuit.

AND GO!
